The Use of **TECHNOLOGIES** to Promote **MOTIVATION** to Learn *Languages*

An invitation to all parents from the Australian Association of French English Bilingual Schools

TUESDAY, SEPTEMBER 8th at 5pm
at Telopea Park School Secondary Library in Canberra

Nowadays, learning languages is a tool for success and many international schools have understood the importance, hence proposing many different programs. With the new technologies more and more present in our daily lives, the questions that arise are: How can technologies help my child to learn better, more efficiently and with an enhance motivation? And how can I help my child to sustain is motivation to learn while educating him to use technologies properly? To be able to answer those questions, I invite you to better understand the problematic surrounding the use of technologies at home and in schools, as well as the concept of motivation to learn. We will also expose some research results on the effects of technologies on language learning and on school motivation. Finally, on a more practical note, we will explore together different useful language applications for mobile devices and computers. By the end of our evening you will be able to fix yourself goals as parents on how to better help your child at school and educate him/her to use technologies in an healthy way. *C'est un rendez-vous ! Soyez-y !*

Emmanuel Bernet has been working in the education industry for almost 20 years. After having been a teacher in primary school and teacher trainer for 15 years for the Montreal School Board, he entered the French school system as an adviser in pedagogical innovation for the French High School in Shanghai. He is now back as a primary teacher for the French School of Singapore since 2013. Holder of a Ph.D. in Education from the University of Montreal, he is also a researcher and author in educational psychology and educational technology for the Center of the Inter-University Research on the training and teaching profession (CRIFPE). As a prior psychotherapist under training and from his teaching practices, he developed a longstanding interest on school motivation and technologies to help students, teachers and parents to face their difficulties on those topics. He often acts as a trainer for the AEFPE, especially in the Asian-Pacific zone.
